Technical Skills

- **Frameworks:** React.js, Express.js, Node.js, Laravel, Spring Boot, Vue.js, Angular, Material UI
- **Programming Languages:** Java, JavaScript, TypeScript, PHP, HTML, CSS, Python, C
- **Databases:** MySQL, NoSQL, MongoDB, Oracle SQL, Firebase, Elasticsearch, UML
- **Software Tools:** Git, Postman, VS Code, Android Studio, CodeBlocks, Eclipse, Power BI, Talend, Trello

Languages:

- **Arabic:** Native
- **French:** Second language
- **English:** Professional proficiency

EXPERIENCES

FULL-STACK DEVELOPER September 2024 – January 2025

Projet : Développement d'une application de gestion de locations de chambres et de logements saisonniers

Réalisation d'une plateforme destinée aux propriétaires pour faciliter la gestion des locations de chambres d'amis et d'hébergements saisonniers.

Fonctionnalités clés :

- Implemented an online booking system with availability tracking, rental request management, and booking validation.
- Developed an admin dashboard to manage tenants, monitor payments, and analyze occupancy statistics.
- Integrated a secure payment module supporting multiple local solutions (ClickToPay, D17, E-Dinar).
- Automated the management of rental contracts and administrative documents, including invoice and receipt generation.
- Created a responsive user interface optimized for both mobile and desktop devices.
- Implemented a notification system via email and SMS to inform owners and tenants about new reservations and completed payments.
- Optimized application performance and security, with a strong focus on data protection and secure transaction validation.
- Ensured continuous maintenance and added new features based on user feedback and evolving needs.

Technologies: Node.js, Express.js, MongoDB, Mongoose, JWT, React, ClickToPay, D17

FULL-STACK DEVELOPER January 2025 – April 2025

Project: Development of a complete e-commerce platform

Designed and built a full-featured e-commerce solution covering both front-end and back-end, enabling merchants to sell their products online securely and efficiently.

Main Features:

- Implemented authentication with role-based access control (customer, merchant, administrator) using JWT and security middleware.
- Developed the order management module: purchase tracking, status updates, and stock synchronization.
- Integrated secure local payment services such as ClickToPay, D17, and E-Dinar.
- Designed and documented RESTful APIs to ensure smooth communication between front-end and back-end.
- Built responsive React interfaces for order management and payment tracking.
- Created a merchant dashboard to manage products, monitor sales, and view real-time analytics.
- Strengthened platform security through input validation, SQL/XSS protection, and robust error handling.
- Structured and managed the MongoDB database using Mongoose (models: products, users, orders, payments).
- Participated in testing, production deployment, and continuous improvement based on user feedback.

Technologies: Node.js, Express.js, MongoDB, Mongoose, JWT, React, ClickToPay, D17

INTERNSHIP – COM&DEV August 2024 – December 2024

Department: Web Development – Technologies: Ruby on Rails

As part of a professional training internship at Com-And-Dev, I contributed to the development and optimization of web applications using Ruby on Rails.

- ◆ Gained hands-on experience in full-stack development within a professional setting.
- ◆ Strengthened my backend development skills and deepened my understanding of Ruby on Rails architecture.
- ◆ Collaborated on real-world projects under Agile methodology.

Attestation: Certified by Mr. Anouar Mansouri, Manager of Com-And-Dev.

FINAL YEAR INTERNSHIP February 2024 – June 2024

Company: ALBARAKA

As part of my final year internship, I designed and developed a web management application for a poultry farming company. This innovative solution enables real-time tracking of poultry growth and efficient stock management. It provides a user-friendly interface for monitoring growth data and helps optimize resource usage, contributing to improved productivity and profitability.

Key Contributions:

Certifications

- **Certificate – Organization (JPO 2023)**

École Polytechnique Sousse, Tunisia

- **Certificate – Organization (Info Night 2023)**

Microsoft Club – École Polytechnique Sousse,

Tunisia

- **Certificate – CCNA**

École Polytechnique Sousse, Tunisia

Organizational Skills

- **Project Management**
- **Agile Methodologies (Scrum)**
- **Information Systems (IS)**
- **Task Management (JIRA, Trello, Asana)**
- **Deliverables Management**
- **Competition:**
 - Nuit de l'Info 2022

- Developed RESTful APIs for various modules including stock management, building management, and flock (batch) management.
- Implemented responsive UI designs based on Figma mockups.
- Built a recommendation system for automated response suggestions using custom APIs.

Technologies: React.js, Node.js, Express.js, MongoDB, TypeScript, Material UI, Git, GitHub, Postman

ENGINEERING INTERNSHIP July 2023 – September 2023

Company: Com&DEV

Designed, developed, integrated, and deployed a web-based management system.

Technologies: React.js, Ruby on Rails, MySQL

INITIATION INTERNSHIP

July 2022 – September 2022

Company: Designed & Dusted

Developed a web application for purchasing medication.

Technologies: React.js, Node.js, Express.js, MySQL

Associative Experiences

- Member, Microsoft Club – Polytechnique Sousse, Tunisia (2023)
- Participated in organizing the “Nuit de l’Informatique” (Night of IT)
- Contributed to the organization of the 2023 Open Doors Day (JPO)
- Participant, OpenIA – 2nd Edition – Polytechnique Sousse, Tunisia (2022)
- Member, Tunisian Red Crescent – Poly-Estim Club, Polytechnique Sousse (2022)
- Took part in the 2022 Night of IT
- Participated in the “Reyada” leadership event
- Co-created a social and cultural project

• VolaSoft

Developed a web management application for a poultry farming company, allowing growth tracking and stock management.

Technologies: React.js, Node.js, Express.js, MongoDB

• Portfolio

Personal web application showcasing my profile and projects.

Technology: React.js

• LocationCars

Web application designed to manage academic project logistics and car rentals.

Technology: Spring Boot

• IA-Cam

Smart driver alert system to detect drowsiness and prevent accidents.

Technologies: Python, React Native

• Netflix Web Scraper

Web scraping model built to collect and analyze content from Netflix.

Technology: Python

• Stock Management App

Desktop application for managing inventory and tracking stock movements.

Technology: Java

• Altagem Web Application

Web platform developed for internal operations of the Altagem organization.

Education

Engineering Degree in Computer Science

September 2021 – July 2024

École Polytechnique Sousse, Tunisia

- Specialized in Software Engineering
- Key Modules: Algorithms in C, Network Design (CCNA 1 & 2), Object-Oriented Programming in Java and C++

Integrated Preparatory Program

- September 2019 – June 2021
- École Polytechnique Sousse, Tunisia

Baccalaureate in Technical Sciences

- September 2014 – June 2019
- Lycée Secondaire de Bekalta, Tunisia
